# Meeting the Challenge

## Disposable Suction Liners with Antimicrobial Protection

With more and more emphasis on AMR (Antimicrobial Resistance) emanating from all Health Care Professionals across all specialities, all over the world. VacSax Limited has taken the unprecedented step of manufacturing **ALL** their Disposable Suction Liners with Antimicrobial Protection.

**VacSax** are doing this with no added cost to the Customer, whilst maintaining their high standards of manufacture. The systems

operate in exactly the same way; the only visible difference will be that the standard Green Cap Liner will be manufactured in **Black**.

However the **Blue Cascade Liner will remain Blue**.

This will be happening over the coming months.

---

**All VacSax Suction Liners will have Antimicrobial Protection.**

---

The only Liners to show a visible difference - moving from Green to Black will be:

---

- **1 Litre Advance Liners -**  
Part Numbers 9910-340 and VAL-104
- **1 Litre Advance PreGelled Liners -**  
Part Number 9810-101
- **2 Litre Advance Liners -**  
Part Numbers VAL-201, VAL-202, VAL-204
- **2 Litre Advance PreGelled Liners -**
