Presentazione / Introduction

Betatex S.p.A. è il maggiore produttore italiano di teleria ospedaliera monouso in tessuto non tessuto. Dal 1976 produce teli chirurgici, camici ed abbigliamento, sia per sala operatoria che per visitatori, custom packs procedurali, mascherine chirurgiche e vari accessori per tutti i reparti ospedalieri.

I nostri stabilimenti si trovano ad Assisi e coprono una superficie di 10.000 mq su un'area totale di 20.000 mq.

La nostra tecnologia include linee automatizzate per la produzione e il confezionamento di teli monouso, custom packs, kits per sala operatoria e mascherine chirurgiche.

L'azienda produce in camere bianche su una superficie di 1.200 mq ed ha una centrale interna di sterilizzazione ad ossido di etilene.

I nostri prodotti sono indirizzati a tutti i reparti ospedalieri (radiologia e cardiologia interventistica, emodinamica, neuroradiologia, urologia, ostetricia e ginecologia, ortopedia, dialisi, oftalmologia).

Grazie alla sua capacità produttiva, all'utilizzo di una vasta gamma di componenti di alta qualità e ad un costante impegno nella ricerca e sviluppo, Betatex è divenuta negli anni leader nel mercato dei custom packs procedurali. Siamo presenti nelle maggiori strutture ospedaliere Italiane ed europee grazie ad un network di esperti nei vari settori di competenza. I continui e sostanziali investimenti nella tecnologia produttiva consentono un elevato rapporto qualità/prezzo.

Betatex S.p.A. is the biggest Italian manufacturer of surgical drapes. Since 1976 produces surgical drapes, gowns and clothes, both for operating theaters and visitors, custom procedure trays, surgical masks and various accessories for the all the hospital departments.

Our facilities are located in Assisi and covers 10.000 square meters on a total area of 20.000 square meters.

Our technology includes automatic disposable surgical drapes production line; automatic surgical drapes packaging, custom packs and kits for operating theatres; automatic surgical masks production line.

We also have clean rooms on about 1.200 square meters and internal E.T.O. sterilization plants.

Our main products are addressed to hospital departments (cath. lab., interventional radiology and cardiology, neuroradiology, vascular surgery, cardio-surgery, obstetrics and gynecology, urology, dental surgery, ON/OFF dialysis, ophthalmology).

Thanks to its production capacity and the use of a wide range of high quality components, as well as an ongoing commitment to research and development, Betatex has become over the years one of the market leader in the custom procedure trays business. We are present in the biggest Italian and European hospital, thanks to a network of experts in every field of competence. The continuous and substantial investments in production technology, enable a high quality/price ratio.

CUSTOM PACKS procedurali

I vantaggi nell'utilizzo dei Custom Packs in ogni tipologia di intervento, sono molteplici:

Standardizzazione delle procedure

cercando di unificare l'uso dei prodotti necessari quando più operatori sono dedicati allo svolgimento delle medesime mansioni;

Riduzione dei tempi di lavoro

abbiamo stimato che, disponendo immediatamente di tutti gli accessori senza che questi debbano essere reperiti all'ultimo momento, si riducono i tempi di preparazione della sala e cambio paziente tra un intervento e l'altro del 36-38%;

Aumento dell'efficienza delle sale operatorie

riducendo i tempi, le sale operatorie sono molto più efficienti e produttive e si ha un notevole incremento dell'efficienza chirurgica;

Riduzione dei rischi di contaminazione

disporre di tutto il materiale occorrente all'interno di un unico involucro che, quando aperto, costituisca un campo sterile, riduce notevolmente il rischio di contaminazione batterica;

Riduzione delle scorte minime

programmando l'acquisizione dei Custom Packs, che seguia di pari passo lo svolgimento delle procedure, si avrà un risparmio di costi e di spazio;

Determinazione dei costi per procedura

non dovendo più calcolare il costo di ogni singolo componente ma semplicemente quello del Custom Pack procedurale, si semplificherà molto il calcolo relativo al costo delle singole procedure.

procedural CUSTOM PACKS

The advantages of using a Custom Pack in each kind of procedure are numerous:

Standardization of the procedures

unifying the use of the products needed when more workers are dedicated to carry out the same duties;

Reduction of downtime

disposing immediately of all the products inside a unique pack, reduces the time of preparation of the operating room and changing patient between an intervention and the other of 36-38%;

Increase of the efficiency of the operating rooms

reducing time, operating rooms are much more efficient and productive and there is a considerable increase in efficiency;

Reduced risk of contamination

having all the products inside a single pack that, once opened, is a sterile field, greatly reduces the risk of bacterial contamination;

Reduction of the minimum stock

planning the acquisition of Custom Packs, which follows hand in hand the execution of the procedures, you will be saving cost and space;

Cost reduction

calculating the cost of the Custom Packs, instead of the cost of every single products, will greatly simplify the calculation of the cost of every single procedure.

RADIOLOGIA INTERVENTISTICA

INTERVENTIONAL RADIOLOGY

Grazie alla vastissima gamma di accessori disponibili Betatex può soddisfare le richieste per tutte le tipologie di intervento.

Si possono configurare **custom packs base**, che contengono il minimo necessario per l'esecuzione della procedura, oppure **premium**, che contengono la maggioranza dei componenti necessari.

Di seguito troverete alcuni esempi dei nostri custom packs per diverse procedure di radiologia interventistica vascolare ed extra-vascolare.

Essi rappresentano solo una piccola traccia delle possibili configurazioni. Grazie ai componenti presenti in questo catalogo il chirurgo avrà molteplci soluzioni per tutte le sue richieste procedurali.

Tutti i nostri pacchi sono comunque personalizzabili a seconda delle esigenze di ogni singolo utilizzatore.

Thanks to its production capacity and a wide range of high quality components available Betatex can satisfy all the requests for all kind of procedures.

It's possible to create **basic custom packs** with a minimum quantity of components to perform a specific procedure or **premium custom packs** using the most of the components needed to perform a complete procedure.

Here below some example of our custom packs for different procedures of Interventional radiology, both vascular and non-vascular. They represent only a small part of all the procedures that can be performed. Thanks to the components in this catalogue surgeon will have countless solutions to meet his/her surgical needs.

All our packs can be customized following every single need of every single customer.

Teleria / Drapes

Betatex S.p.A. è il maggiore produttore italiano di **teleria ospedaliera monouso in tessuto non tessuto**.

Utilizziamo unicamente materie prime europee e laminiamo il tessuto non tessuto all'interno del nostro stabilimento.

Siamo in grado di produrre una vasta gamma di tessuti e di personalizzarli a seconda delle esigenze. Non solo il tipo di tessuto è personalizzabile, ma anche le dimensioni e le caratteristiche di ogni telo: dal numero dei fori, al numero di bande, ai vari accessori che possono esservi applicati (tasche, sacche, rinforzi, ecc.).

Elenchiamo di seguito alcuni dei nostri principali teli per lo svolgimento delle procedure sopra elencate.

Betatex S.p.A. is the biggest Italian manufacturer of **disposable surgical drapes in non-woven**.

We only use european raw materials and laminate the non-woven inside our plant.

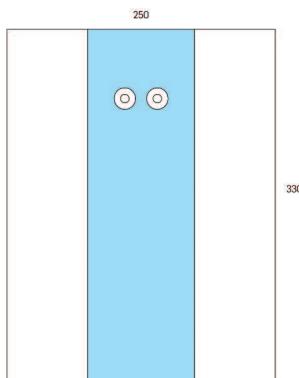

Therefore we are able to manufacture a wide range of fabrics and customize them following your requirements.

We can also customize the dimensions and the features of each drape: number of holes, numbers of side bands and various accessories to be added (pouches, bags, reinforcements, etc.).

Here below some of our main drapes to perform the procedures previously described.

Teli angiografia femorale

Camici chirurgici / Surgical gowns

I camici chirurgici **Betatex in SMMS** (Spunbond/Meltbond/Meltbond/Spunbond), sono idrorepellenti e traspiranti. Sono termosaldati, hanno i polsini in maglina e la chiusura superiore in velcro.

Oltre alle cinque taglie tradizionali (S/XXL) siamo in grado di fornire la versione LONG.

Inoltre Betatex offre **camici chirurgici in Spunlace (Sontara®)**, che garantiscono un confort ottimale grazie ad una maggiore drappeggiabilità e traspirabilità.

Sia i camici in SMMS che quelli in Spunlace possono essere rinforzati sul davanti e sulle maniche.

Betatex gowns in SMMS (Spunbond/Meltbond/Meltbond/Spunbond) are water-repellent and breathable. They are welded, they have knit cuffs and a velcro back closure.

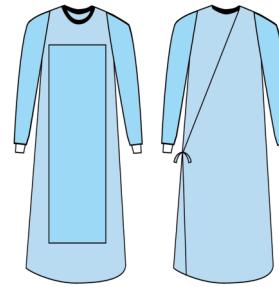

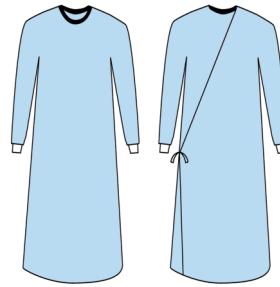

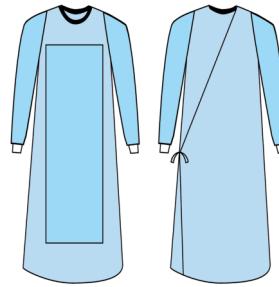

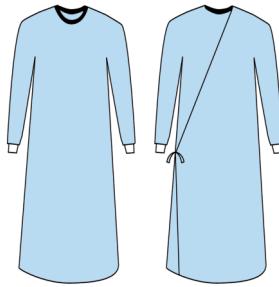

In addition to the traditional five sizes (from S to XXL), Betatex can supply the LONG version.

Betatex can also offer **Spunlace (Sontara®) surgical gowns** that guarantee a better comfort thanks to a better drapability and breathability.

All this gowns are available both standard and reinforced on the front and on the sleeves.

Componenti / Components

Betatex S.p.A. presenta di seguito **un'ampia gamma di componenti** che consentono al chirurgo di personalizzare agevolmente il pacco procedurale.

Il cliente/chirurgo troverà quindi tutta la serie di accessori maggiormente utilizzati e scelti per queste procedure di intervento, **per una facile ed immediata composizione del suo custom pack procedurale.**

Betatex S.p.A. è comunque in grado di soddisfare e supportare il cliente nella ricerca di componenti diversi, non presenti a catalogo, nella logica di offrire il miglior servizio di customizzazione possibile.

Betatex S.p.A. shows in this section **a wide range of components** which allows the surgeon to easily customize the custom procedure trays.

The customer/surgeon can find here the full range of most used and chosen accessories for these surgical procedures, **for an easy and immediate composition of his procedural custom pack.**

Betatex S.p.A. can satisfy and support the customer looking for components not present into this catalog, offering the best customization service possible.
